Date of birth:	Nov 2012	
Medical Diagnosis:	Ventricular septal defect	
Medical Assesment:	Feb 2014	
Type of Surgery:	Open-heart surgery	
Surgery Cost:	2256 USD at Tam Duc heart hospital	
Family income:	Low and unstable income (94 USD total/ month)	
Family situation:		
<p>Hao Uy is the youngest of 2 children whose father woks as sea-fisherman. He has been diagnosed with an inborn heart disease called Ventricular Septal Defect recently at Tet 2014. The doctors suggested that he needs to take an urgent open-heart surgery in order to saving life because of his weak body resistance. Their house was built by the help of neighbors. They have still indebted 200.000.000 VND (9400 USD) that they borrowed to give medical care to Uy and cover living expenses. The father is a worker engaged in full-time marine fishing which is such a dangerous job. No matter how hardworking he is, he is still unable to earn enough money for family's living. The mother stays at home and take care of Uy and his brother who is just 5 years old.</p> <p>Now, Uy was brought into Tam Duc heart hospital as soon as he has experienced many serious symptoms. However, because the parents can not afford the hospital cost, so that the little Hao Uy has not yet had surgery. He is in urgent need of helps and donations to survive.</p>
